SKILLS

- Web Devolopment(HTML, CSS)
- JavaScript
- React JS
- Back-End
- mongo DB
- Python
- Git
- Node Js
- Customer service
- Teamwork
- Intermediate English

I have experience in web development, specializing in HTML, CSS, JavaScript, React.js, MongoDB, Postman, and NoSQL. I'm passionate about creating intuitive interfaces and implementing efficient solutions. I've participated in both individual and team projects, applying best practices and version control with Git. During my Systems Engineering studies, I worked on educational projects using Python, including the development of a music platform. I also completed an internship at CoderHouse, where I contributed to building a landing page for the company Matching. I collaborated in organizing the development team, assigning tasks, and ensuring efficient execution. I'm currently seeking opportunities in the programming field to achieve my goals and grow both professionally and personally
